

[*System for Minimizing the Impact of Poisoning of Automotive Exhaust Aftertreatment Systems*]

Abstract of Disclosure

An exhaust aftertreatment system for an internal combustion engine is disclosed which mitigates deleterious poisoning of a catalytic converter or exhaust gas oxygen sensor by phosphorus containing species.

A copy of the original application was filed with the U.S. Patent and Trademark Office on [REDACTED] and assigned Application No. [REDACTED]. This is a continuation-in-part application of U.S. patent application Ser. No. [REDACTED], filed on [REDACTED], which claims the benefit of U.S. Provisional Application No. [REDACTED], filed on [REDACTED].
